

# JSP Navigator Barrier

The Navigator® is a blow moulded high density polyethylene barrier that has been developed for attended and unattended street work. This is a cost effective solution to ensure safety by segregating hazards and areas that could potentially cause a danger.

## Features And Benefits

- **Storage & Distribution** - An effective stacking solution designed to maximise stability and storage for 40 units per pallet.
- **Stacking Feature** - Stacking feature enables each barrier to lock together to ensure safe storage and transportation.
- **Multiple Configurations** - Designed for contractors to use in numerous configurations offering adaptable solutions to secure additional barriers. This free standing barrier with 360 degree swivel feet can also be positioned at a 90 degree angle to ensure stability.
- **Easy to connect** - Easy to link making it possible to connect barriers together incorporating the peg and hole system.
- **Reflective panel** - Class R1 high intensity reflective panel that conforms to BS EN 12899-1.
- **Surefoot Bloc™** - Compatible with the Surefoot Bloc™. A 6.5kg recycled PVC foot cover to add weight and extra stability.
- 2 metres in length
